

## How To Safely Tie Your Horse Using Horseman's Reins (for Snaffle or Hackamore)

*Step 1.* Bring all the slack in the reins to the left or right side of your horse's neck. Make an "X" forming a big loop.

*Step 2.* Put the big loop over the horse's head. Adjust so reins are in four equal lengths.

*Step 3.* Take the lead end (shaded dark) and tie a half hitch by going around all four lines. Then tuck the end through itself to form the half hitch.

You may now safely tie your horse without danger of pull on the snaffle bit. Pull will instead be on his neck.
